1 Introduction

Jazz/Pop Musician is a 2-year MMus programme where students can continue the development of their knowledge, skills, and qualifications as jazz/pop musicians and music teachers.

Taking his/her musicianship as a starting point, the student immerses himself/herself in his/her main instrument and creative work, as well as related subjects and projects that form the basis of the student's choices in relation to a future artistic career.

Depending on the subject, electives and projects (35 ECTS in total) focus on artistic and/or pedagogical qualifications.

Artistic electives must make up at least 20 ECTS.

The programme thus forms the basis of the student's choices during his or her future career as a musician and possibly as a music teacher.

The MMus degree may also be used as a background for further studies at soloist level.

Programme structure

The programme focuses on the student's development as a musician and artist.

Emphasis is placed on the main instrument and on subjects supporting and developing a creative and reflected approach to creating music.

The programme gives students a great deal of freedom, for example when choosing electives. Electives are studied in joint classes with other MMus students from all programmes.

Artistic entrepreneurship, which is concluded after the 2nd semester, provides the student with relevant tools for administering his/her artistic and pedagogical ambitions through e.g. self-management and entrepreneurial skills.

The programme concludes with a student-defined Master's project based on student interests and needs. The project constitutes the student's specialisation in jazz/pop music.

The programme subjects are divided into the following fields:

- Main study area: subjects where the student is a performer and creator, as well as subjects and projects that support the student's artistic profile
- Electives: subjects and projects supporting work as a performer, creator, or teacher
- Artistic entrepreneurship: subjects and projects where the student explores the role as entrepreneur and manager of dynamic processes, and in addition develops his/her career management tools
- Master's project: in addition to work on the project itself and attendant guidance, this includes tuition on subjects that prepare the student for the final project work
