

Purpose

The test consists of three parts: The first part is an auditive test, where the student must answer several listening assignments. After a short break comes the second part, which is a test of dictation- and correction where the music you listen to must be compared to the notated. The third part is a visual test where the student must answer a number of note reading- and harmonization tests.

The assignments of all three parts of the test range from relatively simple to more complicated. You may find some of the assignments difficult to solve. In that case, do not let it affect you, just move on to the next assignment and concentrate on that. The purpose of the test is to identify how far your aural ability, your orientation ability and your musical knowledge carry.

The test can only be taken in Danish, English or German.

Duration: Approx. 2½ hours

Assessment criteria

When the test is assessed it is divided into 5 parts:

A1 Auditive test: assignments 1-6 and 10-11

A2 Auditive test: assignments 7-9

V1 Visual test: assignments 1-10

V2 Visual test: assignments 11-13

D Dictation/correction test: assignments 1-7

One mark is given for each of the 5 parts. The collected mark is calculated as an average of all the 5 marks. It is a precondition to pass the test that either a) all 5 parts are passed separately *or* b) that at least 4 parts are passed *and* that the collected average mark is at least 4.
